

RFP FY18 Expansion of Security Camera System-DHS

Questions & Answers:

Last Updated: 6/7/2017 1:20PM

Q: When is the estimated start date for the project (or when is this project planned to commence)?

A: As stated in the RFP we plan to announce the bid award "after July" (*in August*). At that time we will work with the winning bidder to establish a project timeline that will work best for all involved.

Q: If the project starts after school is back in the fall / while school is in session what are the expected work hours? Will we need to plan on working normal hours and working around student traffic...or will it be alternate late night hours and weekends...etc.?

A: DPS will work with the winning bidder to determine work hours. If your labor rates differ on nights and weekends please provide cost options in your bid.

Q: How many existing cameras are operational?

A: No existing cameras are relevant to the current project.

Q: What is the minimum record archive time required?

A: No minimum archive time has been specified. Please spec server according to Salient recommendations.

Q: When will this project need to be completed?

A: DPS will work with the winning bidder to establish a project timeline that will work best for all involved.

Q: What is the number of pixels per foot required at each target distance from each camera?

A: Please refer to camera requirements specified in the RFP.

Q: Are all exterior cameras required to be only mounted on buildings?

A: No. However, if you bid alternate mounting please include all associated costs.

Q: Is there any objection to panoramic and multi sensor cameras?

A: No objection to panoramic or multi sensor cameras as long as they are compatible. We prefer to stay away from fish-eyed images that require de-warping.

Q: How many client workstations are planned for access?

A: 15 – 30 total; with most likely 5 or less viewing simultaneously.
